# PUBLE

”Will change the way you drink!”

Jussi Loiri
Jaakko Purhonen
Jani Taalikka

Main Idea in a nutshell

- The Leatherman for everyone who likes to go out and have fun.

- It locates your whereabouts and searches the nearest places to eat, drink and party all night long.

- You can get detailed information about the hip places.

- Real time information such as special offers, customer count, menu…
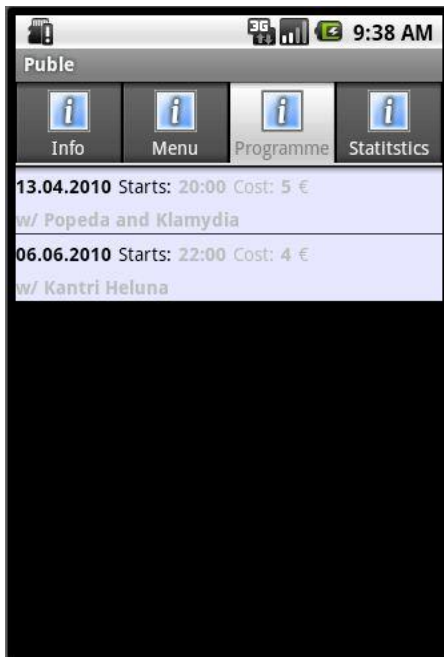

Application features

- Easy to use main menu.

- Map with demonstrative icons.

Application features

• Detailed information of selected destination.

• For example information about the upcoming events.
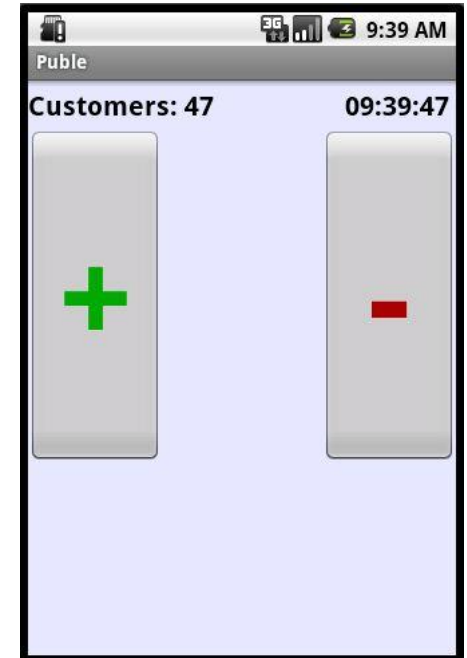

Application features

• Find places of your desired city.

•Simple and clear results.

Application features

- Clicker for real time customer count for bouncers.

- Keeps bouncer up to date.

Conclusion

- Failures / difficulties
  - Getting started.
  - Not all of the planned features work as we would have wanted.
  - All of the examples in Android developer site were not fully functional (version differences?).
- Successes
  - After the first difficulties the work started to flow.
  - Implementation of most of the features.
  - Very good starting point for future Android development.
