

## Android Code Camp

## LunchMagnet

*Harri Johansson*  
*Antti Knutas*  
*Tommi Kähkönen*

# The Point

- 🤖 Location aware ad-hoc social networking service
- 🤖 Enables the fast gathering of people around unplanned or unscheduled activities
  - 🤖 Eg. inviting friends nearby to have lunch with you
- 🤖 Automates discovering your friends in the area:  
No more calling around to see who's in the town

# Behind the Curtains

- 🤖 Uses the following Google Android services:
  - 🤖 Android Location Services
  - 🤖 Google Maps (mapview)
- 🤖 Our own web service for sharing friend list data
- 🤖 Important functionality based on these features:
  - 🤖 Friend discovery
  - 🤖 Distance calculation
  - 🤖 Communication and event invites
