Goal

- Provide information for volunteers worldwide

- Help organizations to recruit volunteers and share information about them

- Improve volunteer involving process by making it easier

Problems

- It's hard to find all information about volunteer activities in one place because it's spread all over Internet

- There is no shared repository for volunteering organizations

Idea

- Centralize volunteer organizations inside a single place

- Give people brief information about nearest volunteer activities

- Give people information about priorities of current volunteer activities

- Easy way to locate nearest volunteering areas using maps

Solution

- Centralized application for all sides of volunteering process

- Geolocation tool with volunteer activities from all over the world

- Channel for communication between volunteers and organizations

Features

- Organizations can register
- Organizations provide information about volunteer activities
- Volunteers can search for a volunteer activity
- Volunteers can register
- Volunteers can contact organizations
- Organizations can search for volunteers

Technologies

- Microsoft .NET Framework
- Microsoft SQL Server
- Microsoft Silverlight
- Bing Maps
