NET Code Camp

Microsoft Tour
.NET Basics Code camp

codecamp.it

Problems

- Information about volunteer activities is spread all over Internet
- You cannot find useful information in a single centralized place

Solution

- Centralized application for all sides of volunteering process
- Geolocation tool with volunteer activities and organizations from all over the world
- Channel for communication between volunteers and organization

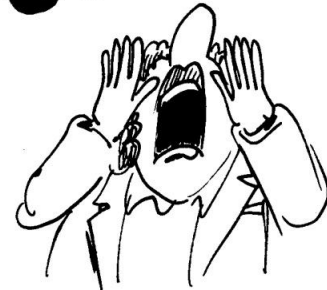

Features

- Registration of new volunteers
- Searching organizations, volunteers and volunteer activities
- Categorize activities by urgency
- Use of geolocation

Volunteers!

Problems

- Information about volunteering activity is spread all over the internet!
- You cannot find information in a single centralized place!

Solution

- Centralized application for all sides of volunteering process
- Geolocation of volunteer activities and organizations from all over the world
- Channel for communication between volunteers and organization

Features

- Registration of new volunteers
- Searching organizations, volunteers and volunteer activities
- Categorize activities by urgency
- Use of geolocation

Technologies

Microsoft®
SQL Server®

bing™
maps

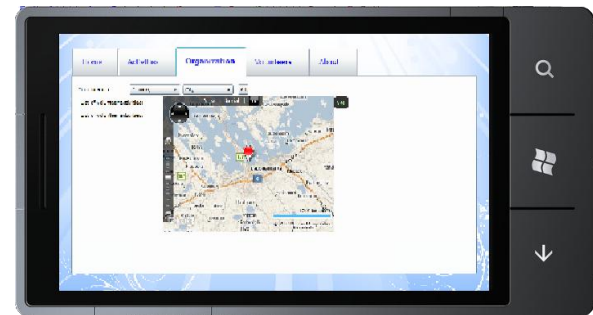

Microsoft®
Silverlight™

Improvements

- RSS feeds
- Registration of organizations
- Registration of new volunteer activities
- Mobile application

.NET experience

- What was impressive
 - Integration between different technologies
 - One programming language for everything
- What was good
 - It's easy to create very beautiful user interface
- What was bad
 - Coding speed quite slow

Thank you
for your attention
