Volunteering for Everyone

V4E supports the volunteer within you

Volunteering can be easy!

Why do people volunteer?

To learn new skills? To have fun? To make a difference?
People have different reasons to volunteer but for whatever reason not all of them have the information needed to give a helping hand.
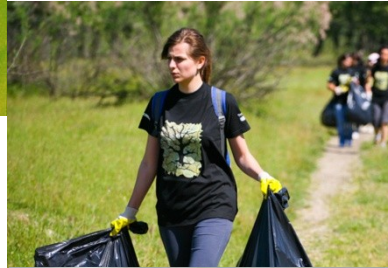

How many volunteer organizations can we search over the internet?

"31 700 000 results" in Bing!
Which one to choose? Where to look?

What if they want to volunteer in different fields or locations?

What about organizations?

When a disaster appears there is not time to lose for searching people. Volunteers can be there waiting to be called.
Wouldn't be nice to have some kind of *"yellow pages"* of volunteers?

Maybe all this problems are actually already solved, but all of them separately, no single solution. Not all together.

### *Volunteering for Everyone is that tool, that directory!*

It centralizes organizations and volunteers into a single place.

Architecture

V4E provides the following features:

- Web application for both sides
- Geolocation tool to show volunteering activities around the world
- Registration of volunteers for sharing information about them to the organizations
- Registration of organizations to share information about themselves and their activities
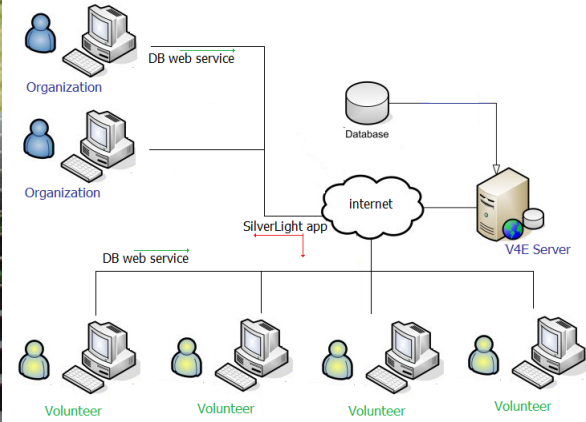

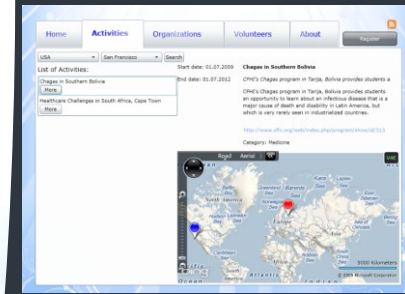

About the Millennium Development Goals, V4E is trying to achieve

The Develop a global partnership for development

User Interface

V4E, Volunteering made easy!
