

In spite of great advances in medicine globally, many parts of our world, especially areas classified as developing countries, still suffer from sudden and devastating epidemics

Can We help to reduce the risk and death from these Epidemic?

Yes We can?

EPIC WATCH

*That is why the innovative Epic Watch System has been developed, with the sole purpose of helping health professionals and other trained personnel to capture, analyze and process data, based on defined threshold to declare epidemic, or warn against it, in a timely fashion. For more information visit ---
