Green Inn

With sustainability at its core, the GreenInn incorporates automated sensing and control for minimizing environmental footprint.

ENVIRONMENT

10% energy savings for a 1000 room hotel = 50 million €/year. Good not only for the planet but also for the wallet.

ECONOMY

A place where you travel in the confines of your room with VR and 3D print your clothes! No need to drag the suitcases anymore

TECHNOLOGY

A pioneer in enabling green travel. The first hotel where you control your own footprint and the more you save the cheaper it is for you.

INDIVIDUAL & SOCIAL
