RATE
MY PLACE!

Hi my name is Dr. Fish

I am here to help you find the perfect place to live in. I called this app "Rate My Place!". I am pretty sure you're gonna like it a lot, so are you ready?

Say "yes" to the place

Finding a right place to live can be difficult, especially when you move in to some new place where you have no idea how it is gonna look like. Before making a decision, you need enough information regarding the surrounding neighborhood (transportation, place to eat, shops, hospital, schools, atm etc).

That's why you need "Rate My Place!"

"Rate My Place!" will guide you to find your dream apartment just in one click. It has all the information that you need to determine the quality of an apartment and also provides you the rate of the apartment. Good news is, it is absolutely easy to use!
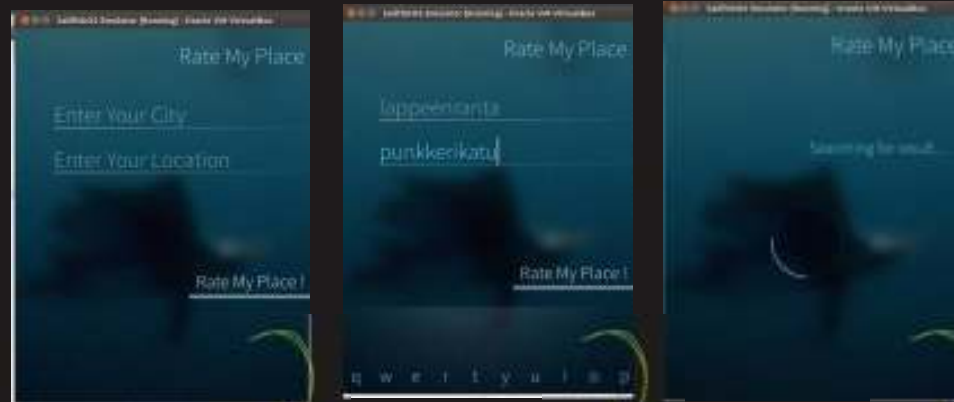

And there's more...

- It allows you to input your own address
- It has information for any address in the world
- It gives you a rating based on the distance criteria
- It gives you distance from your address to nearest bus stops, shops, atm, university, city center, restaurant, and hospitals
- It gives you detail address and exact location on the map
