INFO-PIC

WHAT: Is a Maemo application in which you can share information of any construction site (Ex: Broken Item, walls, and any other problem with the construction) and attached to its picture taken.

WHY: Save time and money, faster and effective communication, reduces an unnecessary queries, provides as clear as possible information

HOW: Picture of the item will be taken by the camera, and information will be attached as a comment to the picture and will be sent to the recipient. (Ex: Head engineer in charge, or any other trusted person who can give idea)
