

# Group 1 – PaavoInsurances

- **Laitinen:** Lead front end developer
- **Pohjala:** Special features, front end
- **Repo:** UI, front end
- **Virta:** UI, front end

# Idea

- **Insurance sale app**
- **Three priorities:**
  - Calculate the offer of home insurance and make a contract with customer
  - Collect possible customer information for later contacting
  - Customer loyalty program

# Features

- Customers can make a home insurance contract based on offer
- Customers can join to "spam list", to be contacted later
- Old customers can make a new insurance contract
- Barcode recognition for old customers and joining to loyalty program
- Local database with social security numbers and bonus card numbers

# Tech

- Visual Studio 2013 (C#, JSON.NET, XAML)
- GitHub
- MarvelApp
- Adobe Illustrator CC
- CorelDRAW X6
- Google, Google, Google...

# Few nice achievements

- Barcode recognition for social security numbers and S-card numbers
- Connection to Otso database
- Connection between our own local database and Otso database
- Nice UI!
