

WoWMobileArmory

- We tried to make a mobile frontend for the website wowarmory.com. It gives information about the users character in the game and helps him/her to choose better equipment for his/her character.
 - The image is from a similar Iphone application that we used for inspiration.

WoWMobileArmory

- Search with character name and realm
- Fetching character stats
- Fetching item stats

Qt Coding Experiences

- What was impressive
 - Very effective learning method
- What was good
 - Quite easy IDE
- What was bad
 - Difficulties with pointers
 - Sleepless nights
- What was a showstopper
 - Blizzard's slot system, which has no logic at all
