# Problem

Develop a simple game to:

- Improve graphical memory of the user.
- Teach several basic Finnish words to users.

Solution

- Develop a "match cards" game which users have to memorize cards with the same image and find pairs.
- Instead of plain image, the cards include the name of the image in Finnish language.

Game features

- Can be run both in mobile devices (Android, windows phone) and in a web page.
- Tourists, students and travelers who come to Finland can learn basic Finnish words using Match Pairs.
- Match Pairs can be helpful for Finnish kids who are starting to learn how to read and write in Finnish language.
